	Total Reading	Reading Vocab	Reading Comp	Math			Language	Language Mechanics	Language Expression	Spelling	Science	Social Science		Thinking Skills	Basic Battery

Caution should be used in interpreting grade equivalency scores. Example: If a student at the end of 4th grade scores a G.E. of 8.8, it does not mean that the child can do eighth grade work. Rather, it means that the child scored the same as an average student in the eighth month of the eighth grade, had the eighth grade student taken the fourth grade test. As a corollary, the same is true of a composite class score.
